Speaker 2 (03:07)
It was very, I'd say it's very well. Done, it's pretty clean, like navigating. The main thing, when you're booking a ticket is navigating through the details and like your preferences, and I'd say that was very easy to do, and it has a very simple interface which I like No, I had no issues.

Speaker 2 (03:40)

Do you think of this? The modified version, I mean

Speaker 2 (05:43)

The modified version seemed it was better. I'd say it had more its UI and interface, it was more clean, and like more attractive in its design. I'd say that like in the necessary things.

Speaker 2 (06:04)
Maybe the colours can be a little bit brighter. We can have some brighter colours so that it makes navigation a little more easier, but overall it was still pretty easy to use, just like the last website and also I like the additional features like the filters and like your preferences, so it was I'd say this website was like way better than the previous one.
